

Graid Technology and Sun Way Technology Co., Ltd Partner To Lead The Future of All-Flash NVMe & NVMeoF Deployments

Sun Way Technology now offers SupremeRAID™ NVMe/NVMeoF next generation RAID controller, enabling maximum flexibility, best-in-class data protection, and superior SSD performance for high-intensity workloads.

Santa Clara, CA, Feb 23, 2022 – Graid Technology is pleased to announce a strategic partnership with Sun Way Technology Co., Ltd, Japan’s leading provider of all-flash servers for NVMe & NVMeoF deployments.

Sun Way Technology Co., Ltd, acts not only a distributor but also as a highly specialized proposal-based agency with a focus on AI/HPC storage solutions. A leader in advanced computer infrastructure solutions since 1996, Sun Way has undeniably established itself as a technology and performance leader with strong sales channels in Taiwan and around the world.

“We are more than thrilled to offer SupremeRAID, the world’s fastest NVMe & NVMeoF RAID solution, to the Japanese market. The pursuit of better performance and data protection is of the utmost importance with NVMe deployments,” said Paul Lai, CEO and President of Sun Way Technology Co., Ltd. “It is Sun Way Technology Co., Ltd’s mission to introduce the most disruptive technology to our enterprise users across Japan.”

Graid Technology is pleased to partner with *Sun Way Technology Co., Ltd* to offer flexible, easy to configure IT Infrastructure solutions that drive technology forward while delivering our customers a competitive advantage in the market.

“We are enthusiastic to announce this new partnership,” said Leander Yu, CEO and President of Graid Technology. “Sun Way has long been considered a key player in the high-performance computing market and we are pleased to be closer aligned with them and their mission to advance technology across Japan.”
